

Capability

360 Environmental provides support, advice and project management capability during the environmental approval process. The collaboration of the experience at 360 Environmental covers a wide range of areas including the mining, petroleum, water and land development industries. The team at 360 Environmental has been involved in many environmental approvals including the management of environmental conditions for the Stirling Harvey Redevelopment Scheme, the Burrup Peninsula Industrial Water Supply Project on behalf of the Water Corporation and other key development projects in the petroleum industry.

360 Environmental has experience in environmental impact assessment from a regulatory perspective. The team was involved in the provision of advice for the assessment pollution prevention and social matters of the Burrup Fertilisers project, the Onslow salt development and the Newcrest Telfer expansion. Licence, works approval and ministerial condition compliance auditing has been undertaken on a wide range of industrial sites.

360 Environmental has an excellent working knowledge of the *Environmental Protection Act 1986* (and the associated amendments), the *Environment Protection and Biodiversity and Conservation Act 1999*, Environmental Protection Policies, Guidance notes and Codes of Practice. The team has experience working within the Pollution Prevention Branch of the former Department of Environmental Protection in both the Perth and North West regional offices. Experience has been gained in working through approvals from both the regulator and industry perspectives. This provides an invaluable understanding of the needs and requirements of the stakeholders involved, which can expedite the approvals process. This local knowledge arms 360 Environmental with an influential network and professional working relationships with decision making authorities and environmental professionals to ensure best practice environmental outcomes are achieved in a timely manner.

Community Consultation

Community and stakeholder consultation is an integral part of the environmental impact assessment process and is a key aspect of the 360 Environmental approach to conducting environmental management. Significant experience in risk communication, facilitation and training of diverse groups of stakeholders strengthens 360 Environmental's capability to manage a successful and participative approvals process.
